

Conservation Agreement

Between

Talbot Soil Conservation District

And

I am interested in conserving and improving the soil, water, and related resources on my property. Assistance is requested in developing a conservation plan or conservation work for my property based on my needs and good land use and management.

I agree to carry out this plan as rapidly as my resources and the assistance available to me will permit, and to maintain the conservation measures that I establish. The District or its representative has the right to go upon my property in developing and carrying out this plan.

The Talbot Conservation District will furnish technical and other assistance in helping to develop the conservation system and in helping to establish and maintain measures called for in accordance with resources available and operating policies in effect at the time the work is done.

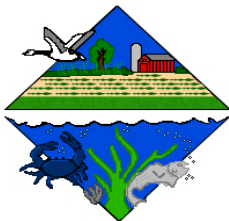

It is mutually agreed that neither the District nor the Cooperator will be liable for damages to the other unless such damages are caused by negligence or misconduct.

The conservation plan will remain in effect until terminated in writing by either party.
